PHARMACY WHITE PAPER – Update December 2008

NEWSFLASH FOR ALL PATIENTS

Campaign Success - Dispensing by Doctors will continue!

We are delighted to inform you that on 16th December 2008 the Government announced that it will abandon its plans to change the current arrangement of dispensing by doctors.

It was thanks to the support of our patients that the Government changed their mind! Eighty thousand patients and doctors across the country responded to the Government's consultation on the proposed Pharmacy White Paper. It was an epic demonstration of patients voicing their views, **BEING HEARD AND LISTENED TO!**

The result is that this practice and hundreds more dispensing practices across the country will be able to continue providing services to their patients.

We wish to sincerely thank all our patients who contacted the Government with their views regarding the possible loss of dispensing at the Chapel Row Surgery and for your continued support during the Government's consultation period.

THANK YOU FOR YOUR SUPPORT
